

Lesson no. 16: What If Analysis-Scenario Manager

What-If Analysis

What-If Analysis in Excel allows you to try out different values (scenarios) for formulas. The following example helps you master what-if analysis quickly and easily.

Assume you own a book store and have 100 books in storage. You sell a certain % for the highest price of \$50 and a certain % for the lower price of \$20.

C	C8 ▼ : × ✓ f _* =B4*(1-C4)							
	А	В	С	D	Е			
1	Book	Store						
2								
3		total number of books	% sold for the highest price					
4		100	60%					
5								
6			number of books	unit profit				
7		highest price	60	\$50				
8		lower price	40	\$20				
9								
10			total profit	\$3,800				
11								

If you sell 60% for the highest price, cell D10 calculates a total profit of 60 * \$50 + 40 * \$20 = \$3800.

Create Different Scenarios

But what if you sell 70% for the highest price? And what if you sell 80% for the highest price? Or 90%, or even 100%? Each different percentage is a different scenario. You can use the Scenario Manager to create these scenarios.

Note: You can simply type in a different percentage into cell C4 to see the corresponding result of a scenario in cell D10. However, what-if analysis enables you to easily compare the results of different scenarios. Read on.

1. On the Data tab, in the Forecast group, click What-If Analysis.

₹		\square						
Text to	Flash	Remove	Data	Consolidate	Relationships	Manage	What-If	Forecast
Columns	Fill	Duplicates	Validation •			Data Model	Analysis 🕶	Sheet
Data Tools						Fore	cast	

2. Click Scenario Manager.

<u>S</u> cenario Manager		
<u>G</u> oal Seek	63	
Data <u>T</u> able		

The Scenario Manager dialog box appears.

3. Add a scenario by clicking on Add.

Scenario Manag	er	?	\times
S <u>c</u> enarios:			
No Scenarios de	fined. Choose Add to add scenarios.	De Ed <u>M</u> er	Id
Changing cells:			
Comment:			
	Show	CI	ose

4. Type a name (60% highest), select cell C4 (% sold for the highest price) for the Changing cells and click on OK.

Add Scenario		?	×
Scenario <u>n</u> ame:			
60% highest			
Changing <u>c</u> ells:			
SCS4			Ţ
Ctrl+click cells to select non-adjacent chan	iging cells.		
C <u>o</u> mment:			
Created by excel-easy.com on 1/24/2020			\sim
			×
Protection			
Prevent changes			
Hi <u>d</u> e			
[ок 🔓	Canc	el

5. Enter the corresponding value 0.6 and click on OK again.

Scenario Valu		?	×				
Enter values for each of the changing cells. <u>1</u> : SCS4 0.6							
<u>A</u> dd		ок	2	Cance	el		

6. Next, add 4 other scenarios (70%, 80%, 90% and 100%).

Finally, your Scenario Manager should be consistent with the picture below:

Scenario Manag		?	×		
S <u>c</u> enarios: 60% highest 70% highest 80% highest 90% highest 100% highest		^	<u>A</u> do <u>D</u> ele <u>E</u> dit		
		~	<u>M</u> erg S <u>u</u> mm	ge ary	
Changing cells:	\$C\$4				
Comment:	Created by excel-ea	isy.co	m on 1/2	4/2020	
		<u>S</u> ho	w	Clo	se

Note: to see the result of a scenario, select the scenario and click on the Show button. Excel will change the value of cell C4 accordingly for you to see the corresponding result on the sheet.

Scenario Summary

To easily compare the results of these scenarios, execute the following steps.

- 1. Click the Summary button in the Scenario Manager.
- 2. Next, select cell D10 (total profit) for the result cell and click on OK.

Scenario Summary	?	×
Report type Scenario <u>s</u> ummary Scenario <u>P</u> ivotTable	report	
Result cells:		
= \$D\$10		1
ок 🖓	Ca	ncel

Result:

Scenario Summary									
	Current Values:	60% highest	70% highest	80% highest	90% highest	100% highest			
Changing Cells:									
\$C\$4	60%	60%	70%	80%	90%	100%			
Result Cells:									
\$D\$10	\$3,800	\$3,800	\$4,100	\$4,400	\$4,700	\$5,000			
Notes: Current Values column represents values of changing cells at									
time Scenario Summary Report was created. Changing cells for each									
scenario are high	scenario are highlighted in gray.								

Conclusion: if you sell 70% for the highest price, you obtain a total profit of \$4100, if you sell 80% for the highest price, you obtain a total profit of \$4400, etc. That's how easy what-if analysis in Excel can be.
