

Lesson no. 3: Corel Draw Toolbox

Corel Draw Tool Box and Function Working with Toolbox:-

 **Zoom tool (Z)** - Change the magnification level of the document window

 **Hand tool (H)** - Drag hidden areas of a drawing into view without changing the zoom level.

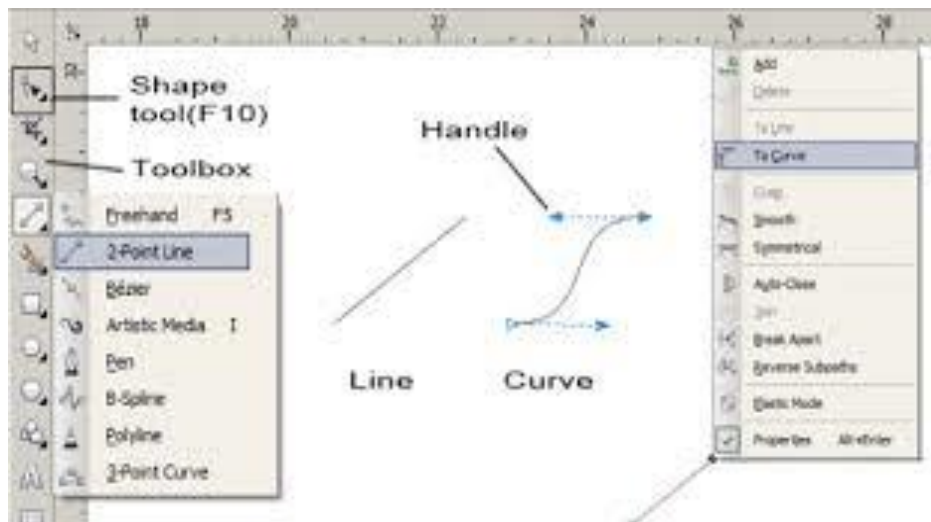

Curve Tools

 **Freehand tool (F5)** - Draw curves and straight line segments.

 **2-Point Line tool** - Draw a straight line by drawing from the starting point to the Endpoint.

 **Bezier tool** - Draw curves one segment at a time.

 **Artistic Media tool (I)** - Add artistic brush, spray, and calligraphic effects by using Freehand strokes.

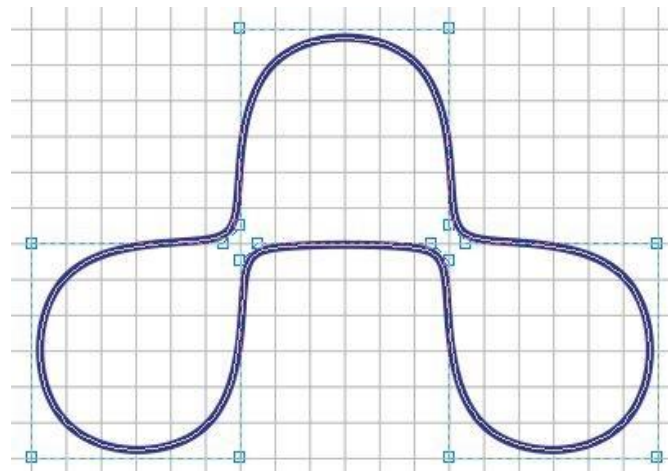

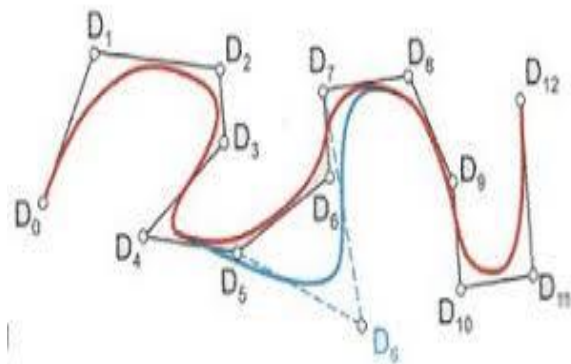

Pen tool - Draw curves in segments, and preview each segment as you draw.

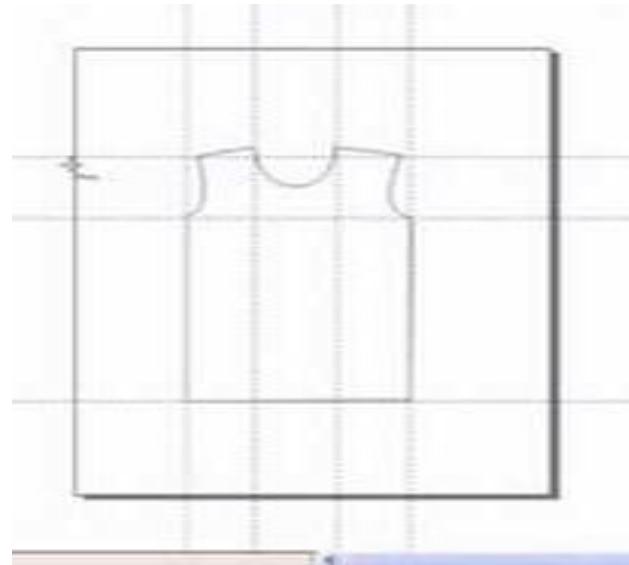

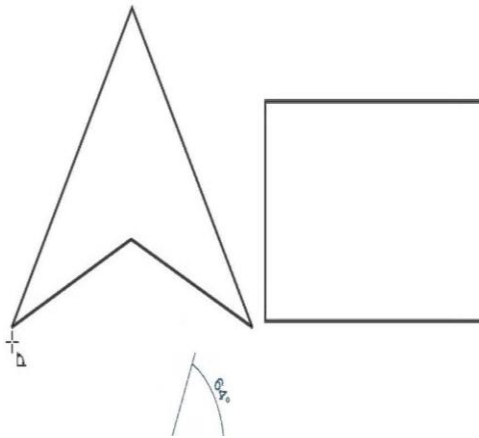

B-Spline tool - Draw curved lines by setting control points that shape the curve without breaking it into segments.

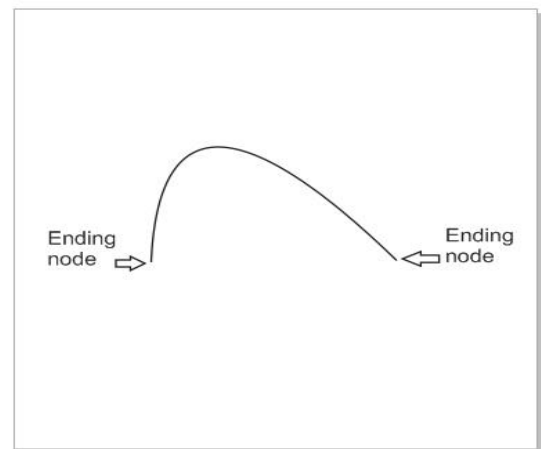

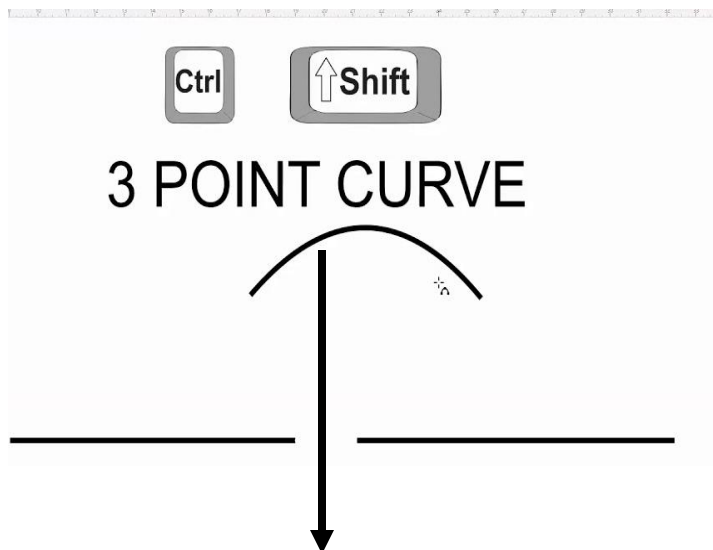

Polyline tool - Draw connected curves and straight lines in one continuous action

3-Point Curve tool - Draw a curve by dragging from the starting point to the endpoint and then positioning the center point.

3 Point Curve draws with Ctrl + Shift Key for Roundness
