Digital Marketing

Lesson no. 9: Login WordPress

Once you have completed the installation of WordPress, you can login to your dashboard. The admin section of WordPress, the "*WordPress Dashboard*", is where you will begin building your **WordPress** site. Please take note that your login credentials are not the same as your cPanel username and password unless you set them up as the same.

WordPress Installation URL: if you installed WordPress on the root of your domain, your URL to access WordPress would be: **example.com/wp-admin**

WordPress Username: This is the username you set up when initially installing WordPress.

WordPress Password: This is the password you set up when installing WordPress. If you emailed the installation details during the installation process it will be in that email as well.

Steps to login to WordPress

To access the WordPress dashboard you simply need to add **/wp-admin** to the end of the URL where you installed WordPress. For example:

example.com/wp-adminCopy

Note! If you installed WordPress to the document root of the url it would be example.com/wpadmin. If you installed WordPress on a folder called "*blog*" on your domain you would go to example.com/blog/wp-admin
